

UNIVERSITÀ DEGLI STUDI DI MODENA E REGGIO EMILIA
CORSO DI PERFEZIONAMENTO IN
REVISIONI SISTEMATICHE E META-ANALISI COCHRANE
Direttore del Corso
Dott. Roberto D'Amico

AVVISO DI SEMINARIO

Lunedì 9 Dicembre 2013, ore 10.30-16.30

Aula T01, Centro Servizi

Azienda Ospedaliera Policlinico, Via del Pozzo 71, Modena

“Come le Revisioni Sistematiche possono influenzare l'agenda della ricerca futura”

Dott.ssa Mona Nasser
Peninsula School of Medicine and Dentistry
Plymouth University, UK

Il seminario è tenuto in lingua inglese. Maggiori informazioni sui contenuti e materiale e sulle modalità di iscrizione possono essere trovate sulla homepage del sito

Workshop programme

Prior to the workshop: You would receive three articles. We will use them as part of the hands-on exercise so I recommend that you read through them beforehand and get familiar with them. I assume that many of you are involved in research so would like to ask you to think what were the motivations and reasons that you selected the topics for your research projects. Was it a senior colleague or supervisor that suggested that you get involved in them? Was it a problem that you faced in medical practice and wanted to address through research? Or did you see great scientific potential in the research question and decided to work on it? If you are involved in a lot of research, select one of them for the discussion. If you are not involved in research, think about what you think should be the motivation or reasons for starting a new research project.

Programme:

10.30 – 11: 00 Introductions: We will start the session with a short introduction of the workshop. Afterwards, I would ask all of you to introduce yourself and give me a feedback on your thoughts on the question that I asked above what were your motivations and reasons for selecting your research projects.

11:00 – 12:00 Lecture: Developing and Evaluating Research Priority Setting Exercises

12:00 – 12:30 Q & A

12:30 – 13:30 Lunch Break

13:30 – 16:30 Hands – on exercise - I will ask you to divide into three groups and each group will be assigned with one of the three articles. You will be given an appraisal sheet based on the evaluation criteria presented in the lecture and will be asked to appraise each paper using the appraisal sheet. You have 1 hour and 30 minutes for doing this. Then each group will be asked to give feedback on their appraisal to everyone. Finally, we will have a discussion on different approaches systematic reviews can be used to inform a research priority setting exercise.
